RELEVANT EXPERIENCE

Fidelity Investments

Merrimack, NH

Full Stack Software Engineer

January 2025 - Present

Associate Full Stack Software Engineer

June 2023 - December 2024

- Engineered and maintained Java/Spring Boot microservices for business-critical internal systems handling middleware data transfer and routing, implementing features such as database replication latency monitoring and enhanced caching workflows across multiple internal firm-wide platforms.
- Led migration of multiple internal applications from legacy deployment tooling to Terraform-based pipelines across all environments, standardizing release processes and improving deployment consistency; additionally supported disaster recovery testing initiatives and integrated static code analysis tooling to strengthen overall code quality.
- Drove end-to-end development, maintenance, and client onboarding for a high-throughput internal infrastructure state management service — delivering performance enhancements, API improvements, and streamlined onboarding workflows to support 80+ client onboardings and a continuously growing user base.

Fidelity Investments

Merrimack, NH

Software Engineer Intern

June 2022 - August 2022

- Contributed to an Agile team supporting an internal service responsible for routing data extracted from a wide range of financial forms.
- Implemented and deployed updates to the service by modifying Clojure and XML mappings and managing build release activities through Jenkins and UrbanCode.

EDUCATION

University of Massachusetts Lowell

Bachelor of Science • 3.7

Computer Science

Lowell, MA • Fall 2021 - Spring 2023

Northern Essex Community College

Associate of Science • 3.8

Computer & Information Sciences

Haverhill, MA • Summer 2018 - Summer 2021

ADDITIONAL EXPERIENCE

Telsonic Solutions

North Billerica, MA

Engineering Assistant

November 2017 - May 2022

- Processed work orders, maintained ERP data (inventory masters and BOMs), and supported logistics and production teams with organizing and shipping ultrasonic welding machines, tooling, and spare parts.
